EDUCATION

Sultan Kudarat State University – Isulan Campus **Isulan, SK**
Bachelor of Science in Information Technology; GPA: 4.00 ***2023 – Present***

EXPERIENCE

Self-Employed **Isulan, SK**
Freelance Web Developer ***2024 - Present***

- Develop custom web systems for students, including capstone and simple projects, and create a variety of other web-based applications.

Freedom Life **Isulan, SK**
Programmer ***2026 - Present***

- *Freedom Life Insurance System*: Deliver a secure, production-ready, role-based multi-branch ERP that strictly implements all business rules in the development plan, protects financial data with auditability and access control, and is fully tested, documented, and deployable for day-to-day branch operations.

PROJECTS

***SKSU Scholarship Management System* | Codeigniter 4, Tailwind CSS, MySQL, Git , Gemini AI API**

- Centralized scholarship processing from application to disbursement, automated CHED and enrollment masterlist comparison for student validation, payroll and billing generation for qualified scholars, dislisting for unenrolled students, ATM-based liquidation with verified proof display, and automated approval workflow routing to the Accounting Officer.

***Freedom Life Insurance System* | Laravel 11 , Blade + Tailwind CSS + Alpine.JS , MySQL, Git**

- A secure, role-based, multi-branch ERP for St. Gabriel Memorial Service centralizes member, policy, collections, OR, deposit, loan, production, reporting, and incentive management with strict audit trails, branch isolation, and business-rule enforcement.

***HealthConnect* | PHP, Bootstrap , MySQL, Git , IprogSMS API**

- Web-based health monitoring for nurses and midwives with comprehensive patient records tracking medical history, appointment scheduling with automated SMS reminders, immunization schedule management for children and adults, and a graphical dashboard for daily, weekly, and monthly analytics.

***AidTrack* | PHP, Bootstrap , MySQL, Git , IprogSMS API , PHPmailer Library, QR Server, Git**

- Digital barangay aid management with secure authentication, beneficiary registration, verification and tracking, real-time monitoring of aid delivery and distribution, SMS notifications, digital receipts and feedback system, and analytics and reporting on aid impact by category.

***BM-SCaPIS* | PHP, Bootstrap , MySQL, Git , IprogSMS API , Git**

- Online barangay clearance and permit management system with digital application, tracking and real-time status updates, resident profile management with application approval workflow, SMS and ringtone notifications for updates and reminders, and comprehensive reports on clearances, permits, and transaction logs.
